

SPA611: Radio Astronomy

Assignment 1

Department of SPASE, IITK

Date: 5th January 2026

Submission date: 12th January 2026

NOTE: All answers must be written honestly and reflect the student's own understanding.

1. Size of sun is 0.5° as seen from earth. Size of moon is the same as well. What will be their sizes, if their positions are exchanged? [Distance to the sun is 1.496×10^8 km and Distance to the moon is 384000 km]
2. How will the brightness of the sun change when we are at earth and at pluto?
